Hvem er OPPLE Lighting

OPPLE Lighting er en global leder inden for belysningsindustrien med over 30 års erfaring. Virksomheden leverer innovative, bæredygtige og energieffektive belysningsløsninger i mere end 70 lande, herunder Danmark. Siden sin indtræden på det europæiske marked i 2014, har OPPLE ekspanderet hurtigt med fokus på høj kvalitets LED-belysning til virksomheder. Virksomhedens unikke virksomhedskultur, engagement i bæredygtighed og innovative løsninger har hjulpet til at blive et betroet brand globalt. I Danmark opererer OPPLE primært i B2B-sektoren og leverer avancerede belysningsløsninger gennem el-grossister og retter sig mod professionelle installatører.

Virksomheden tilbyder skræddersyede belysningsløsninger, der opfylder de specifikke behov i disse industrier, hvilket øger produktiviteten, sikkerheden og atmosfæren, samtidig med at energiforbruget reduceres. Flere nøgletrends præger belysningsbranchen i Danmark:

- **Bæredygtighed:** Virksomheder prioriterer energieffektive LED-løsninger og smarte belysningssystemer for at reducere miljøbelastningen.
- **Smart Lighting:** IoT-integrerede belysningssystemer, der tillader trådløs styring, bliver mere populære, især i kommercielle og industrielle omgivelser.
- **Human-Centric Lighting:** Der er et stigende fokus på belysning, der forbedrer brugernes velvære ved at efterligne naturligt dagslys.
- **Customization:** Flere virksomheder søger skræddersyet belysningsløsninger, der opfylder specifikke funktions- og designkrav.

Mit navn er Christian Strømgaard Andersen, Business Development Manager hos OPPLE, ansvarlig for det danske marked. Jeg er oprindeligt uddannet markedsføringsøkonom, og siden da har jeg arbejdet med salg og projektering til den danske belysningsbranche.

På lang sigt er det vores strategi at blive en vigtig dansk aktør i top 5 af belysningsleverandører.

Hvis du vil vide mere om vores OPPLE-produkter, så kontakt mig, og jeg vil elske at fortælle dig mere om OPPLE Lighting.

Christian Strømgaard Andersen | Christian.Andersen@opple.com | +45 23673575

Vores OPPLE smart belysningssystem skiller sig ud som et omfattende og brugervenligt system.

Smart Lighting-systemet er ekstremt enkelt: Armaturerne kan monteres i loftet og tilsluttes strømforsyningen direkte ud af boksen. Der kræves ingen ekstra ledninger, fittings, gateways, servere eller controllere. Alle armaturer kan styres via den gratis OPPLE Smart Lighting App.

Med Smart Lighting-systemet kan du nemt indstille forskellige lysscener pr. rum. Du kan til enhver tid skifte til den ønskede scene for at complimentere aktiviteten på kontoret, fabrikken, skolen eller enhver anden applikation. En anden smart feature ved OPPLE Smart Lighting er, at vores Smart Sensor måler både bevægelse og lux niveauer i rummet.

Smart Lighting-systemet kan bruges overalt. Der findes forskellige Smart Paneler, nedhængte armaturer og Downlights til dit kontormiljø eller skole. Der er flere Smart Spots, velegnet til hoteller, restauranter og butikker. Endelig er OPPLE Smart Highbays og OPPLE Smart Waterproofs hovedsageligt beregnet til lagerbygninger, produktionsmiljøer og parkeringshuse.
